March 6, 2008

To Whom It May Concern,

Rockbridge Area Community Services contracted Paul Meadows as our Network Consultant in April 2006. The contract was originally to implement a new network configuration including servers, switches, wireless access points, routers, and firewalls. After successfully completing the initial project, RACS has continued to receive services from Paul Meadows in preparation for our conversion to electronic health records. Paul assisted RACS in preparing for the new software by helping to analyze the hardware requirements and then to install and configure the needed servers and storage area network.

Paul has been an immense help to us on many different levels. When we run into an issue we know Paul is a phone call away, ready to work with us toward a resolution. He is able to answer questions that come up in the course of everyday network administration as well as make recommendations as we plan for the future.

We would highly recommend Paul Meadows to anyone looking for a dependable and experienced network professional. He is able to explain things in a non-technical manner and he takes a great deal of pride in his work. The assistance he has provided has been invaluable and he continues to provide good service at a reasonable cost.

If you would like additional information about Paul, you can telephone me at (540) 462-6678.

Sincerely,

Nadine Moore
